This white paper is a detailed document outlining different aspects of this project. This document is a primary source of information about us. The information provided in this white paper does not recommend participation in token presale and is not investment advice, financial advice, trading advice, or any other sort of advice, and you should not treat any of the white paper's content as such.

The details provided in this white paper are accurate to the best of our knowledge. By participating in this presale, or any future token transaction, the investor should accept the security risks and potential financial losses, and we cannot be held responsible. Do conduct your own due diligence and consult your financial advisor before making any investment decisions.

We genuinely believe that the users will benefit by participating in this project. If you reside in a location where the usage of blockchain or/and cryptocurrency is illegal, please do not click on anything related to these activities on this project. You must be the legal age to click on any gaming-related items. The minimum age varies from region to region. Please refer to our age guidelines if you need more details.

Recognizing that the laws and regulations involving similar projects are different everywhere, users are advised to check with the laws that exist within their own jurisdiction or region to ascertain the legality of the activities which are covered. No other rights are transferred to the token holders. Our sole responsibility is to distribute the tokens under the conditions set out in the white paper.

Executive Summary

Cryptocurrencies have long been discussed and debated, but they're only now coming to light as financial tools that can be accessible and useful to more than only die-hard connoisseurs. Cryptocurrencies have the potential to enable social and economic growth throughout the world, including in developing countries, by offering easier access to capital and financial services.

Cryptocurrencies and Bitcoin in particular have a highly utilitarian, yet also disrupting quality that has slowly, but steadily started to interfere with the way the traditional financial system works.

1. A Beneficial Rise in Economic Activities

There is already an entire industry built around cryptocurrencies and it's held by institutions dedicated to supervising all the digital coin exchanges taking place throughout the world. The rate at which the cryptocurrency industry is growing is earth-shattering and this can be confirmed by early adopters that became rich overnight and found opportunities to grow financially. Bitcoin, the most famous of these cryptocurrencies, has already permitted many people and companies to develop and flourish, while many also rely on trading as their source of income. The economy is slowly shifting to adapt to these needs and cryptocurrencies have a great potential in satisfying them.

2. Great Opportunities for Poorly Banked Countries

More than a third of the world population does not have access to basic banking services that can help them out in case of a personal financial crisis - loans, checking accounts and the list can go on.

Executive Summary

These people that in most cases are already financially disadvantaged typically resort to doubtful and dangerous lending practices. The interest rate of these practices is anything but fair, which consequently leads to more instability among the people who requested the loan. This is where cryptocurrencies come in with their high volatility and ease-of-use. There are now many apps and programs that facilitate the use of cryptocurrencies and bring them closer to the wider audience. An added benefit of cryptocurrency use is that it's completely decentralized, so trading can be done freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered and enabled.

3. Low Transaction Costs

Because cryptocurrencies and blockchain don't need an actual brick-and-mortar building to exist, the costs associated with their transactions are minimal. There is no need for employee wages, utility bills or rent to be paid, so these savings naturally morph into low transaction fees. This in turn encourages more and more people to trust these new financial tools and start transactions, allowing for the global economy to be more closely intertwined. And depending on the broker you choose, you can even trade with no minimum deposit requirements.

4. Increased Transparency of Transactions

Since all blockchain and cryptocurrencies transactions are automated and digitized, they are all tracked in a distributed ledger. The best part about it is that it cannot be manipulated by either people or companies, which greatly

Executive Summary

diminishes the risk of fraud and corruption. This means that underdeveloped countries also have a greater chance of entering the financial transactions game and boost their own economy and social prospects. What's more, citizens will be able to keep track of where state funds will be oriented and will thus have a say within their own political climate.

5. More Power to Entrepreneurs

There's never been a more prosperous time to do business than it is now, in the sense that blockchain technology and cryptocurrencies can help entrepreneurs receive payments in more currencies

6. The Conclusion

The world is changing and it's changing quickly. The speed at which cryptocurrencies are taking over is a clear indicator that traditional financial institutions can no longer hold the fort so well and that other financial needs are arising and need to be addressed. Similarly, the world is facing a growing need to tear down borders, in search of a complete social and financial inclusion - this blockchain technology has everything it needs to address such issues.

It will only be a matter of time until these cryptocurrencies definitively find a way into our lives, shaping them for the better, with economic growth and inclusion in mind. Millions of people will now have the opportunity to invest, send money across borders, save money and start a business thanks to the amazing possibilities that cryptocurrencies bring to the table..

Introducing

VITA

What is Vita?

Vita is the best solution to your shopping & utilities. Vita is creating a borderless world for building the most sophisticated, safe, & secure reserve payment system.

Vita, a Binance blockchain based utility token, aspires to bring all people under a unified marketplace to create a unique payment system with a superior and top-notch technology infrastructure to facilitate transactions.

The Vita network is a fraternity of trust, where we assure that people's transactions needs are met on time.

Why Vita?

Vita is a decentralized P2P network of shoppers and contributors. Vita is an integrated and decentralized digital ecosystem that provides disruptive solutions for shopping, payments, gaming, and other day to day utilities. It strategically connects consumers and brands using blockchain technology to evince process transparency and efficiency and to handsomely reward consumers with cryptocurrency tokens in exchange of their digital engagement initiatives. All transactions of each member of the Vita network will be stored in the blocks of the Binance BEP 20 Blockchain.

Safe & Secure: We use Binance blockchain technology where each and every transaction is certified.

Decentralized platform: We use token Vita as a coin autonomously.

Means of Payment: Save your precious Fiat money by adopting Vita as your means of payment.

Borderless shopping: There are no geographical restrictions or limitations in using the Vita coin. It is a universal utility token in Binance Smart Chain not bound by any borders.

In-corrupt & Immutable: It is nearly impossible to corrupt, alter, or hack data in a Binance Smart Chain.

Vision

Our vision is to be a community & innovation driven reserve payments platform that puts together constant iterations and changes fair environment for consumers and brands alike.

1.We want to be recognized as the pioneers in building an innovative and community-driven reserve payment platform.

2.We want to be among the first big Binance blockchain based utility payment platforms.

3.We want to streamline the payment industry in the right direction with notably advanced technology and true transparency.

4.We want to be an example for the next-gen of token economies by building a successful decentralized project.

We envision to propel the process of shopping, gaming, and payments by enabling customers to shop across a unified Marketplace, engaging in transparent transactions of value seamlessly without compromising on security, quality, and authenticity. Our aim is to disrupt the payments industry by democratizing the technology for the consumers efficiently by effectively synchronizing and sourcing their resources without paying commission or fees, eliminating substantial costs involved in the supply chain.

We are striving to create an ecosystem of Vita which would be used for shopping and paying for other utilities. We are single mindedly focusing on democratizing & economizing shopping on a large scale.

Mission

Our mission is to become the leading reserve payment system of choice for buyers and sellers for digital asset users that is easy and safe to use, and are universally acceptable . We endeavour to develop a top-notch platform in harnessing the power of technology offered by Cryptography, Blockchain, and Smart Contracts.

Our mission is to enable Vita digital asset holders to have a safe, secure, and transparent place where they can fully utilize their crypto assets seamlessly and cost-effectively. We also want to become more accessible to billions of users over the decade by building conducive crypto-backed payments solutions for these users.

We dream to create a colossal and scalable payments ecosystem in which all the consumers and brands are connected without any hassles and each one of us take utmost advantage of mutual help available in the Vita fraternity. We strive to continuously innovate our platform & make all things related to payment simple.

We aim to introduce billions of people to the mainstream crypto-economy by enhancing digital excellence, cross-selling opportunities, and increasing earning growth by tapping the capabilities and leveraging them to create unlimited opportunities of growth.

Our value systems are rooted to:

- Integrity
- Excellence
- Willingness to win
- Quality over quantity
- Team work

Where can we use?

Peer to Peer Transactions

Restaurants

Super Markets

Recharge

Shopping Vouchers

Online Ticket Bookings

Vita Tokenomics

Token Name:

VITA

Token Symbol:

VITA

Total Supply:

110,000,000

Blockchain Type:

Binance Smart Chain

Smart Chain Token Type:

BEP-20

Vita Smart Contract:

<https://bscscan.com/token/0x233AE2EB91DC97C723bA4b593D999B16A1Dc90ac>

Token Distribution

Community Bonus	50%
Public Sale	20%
Pre Sale	10%
Promoter's Share	9%
Marketing & Branding	5%
Blockchain Development	3%
Exchange Listing	2%
Charity	1%

Road Map

Q3-Q4 2023

- Team Formation
- Planning & Research
- Community Building
- Tie-ups with established & Growing Crypto Communities

Q1-Q2 2024

IT Team Formation

- Token creation
- White paper creation
- Website launch
- Digital marketing
- Social media promotions
- Buying/Selling on Pancake Swap
- Listing on Coin Market Cap, Coin Gecko

Road Map

Q3-Q4 2024

- Listing on Major Exchanges
- Launching Multi-Utility Platform
- R&D - Own Blockchain
- R&D - Own OTT Chanel

Q2-Q3 2025

- Launching OTT Chanel
- Trial of our own Blockchain
- R&D - Defi Project
- R&D - NFT Market Place

Q4 - 2025

- Launch of our own Blockchain
- Launching De-fi Project
- Tie-up with Top Brands for accepting Vita as mode of Payment
